You are applying to join a research project which is operating in a remote location under conditions which differ substantially from a university campus. The project involves physical labor, extensive hiking, and the ability to work/cooperate with others in close quarters under all kinds of different conditions. Students are expected to be on-site for the entirety of the field school unless prior permission is obtained. This questionnaire helps to ensure that the project operates smoothly and that we have some ideas as to your skill, interests, strengths, and weaknesses prior to the beginning of the field season. Please try to answer as accurately and completely as possible. Prior experience is not required.

By signing this application, you attest that that above information is, to your knowledge, true and accurate. Submitting an application is not a guarantee of acceptance into the course given the limited number of available slots. Possible outcomes include acceptance into the field school, waitlisted for the field school, and rejected from the field school. If you are accepted into the field school and need to withdraw your application, please contact Mackenzie Cory as soon as possible so that someone on the waitlist can take the course.
